Gurparv singh

Senior QA Engineer | Test Automation Specialist | Salesforce & API Testing Expert | Helping Businesses Ship Bug-Free Software with Confidence

Punjab, India

Summary

Senior QA Automation Engineer | Test Automation Specialist | Salesforce & API Testing Expert

With 9+ years of experience in manual and automation testing, I specialize in ensuring software reliability, scalability, and performance. My expertise spans Selenium, Playwright, API Testing, and Salesforce Cloud (Service, Sales, and Community Cloud).

Core Expertise
- Developing robust, scalable test automation frameworks using Selenium, Playwright, TestNG
- Ensuring high-quality software releases through API, Component, Integration, and Regression testing
- Implementing best QA practices with Agile methodologies, Jira, Confluence, and TestRail
- Proficient in Java, Python, JavaScript, SQL for test automation and scripting
- Automating and optimizing workflows using Git, Postman, Maven, Jenkins, Chrome DevTools

Why Work With Me?
-Strong understanding of SDLC and STLC in both Agile and Waterfall environments
- Experience in mentoring and training QA professionals in Manual Testing, Java, and Selenium
- Analytical and troubleshooting skills with a problem-solving mindset

Let's Connect
I am open to freelance, consulting, and full-time opportunities in Test Automation & Quality Engineering. If you are looking to enhance your QA processes or need expert guidance on automation strategies, feel free to reach out.

Experience

Grazitti Interactive
5 years 11 months

Senior Salesforce Quality Analyst
November 2021 - June 2025 (3 years 8 months)
Panchkula, Haryana, India

- Designed and implemented robust, maintainable test automation frameworks using Selenium, Playwright, and TestNG, reducing test execution time by 30%.
- Developed a combination of UI and API automation tests to enhance testing robustness and efficiency.
- Collaborated with cross-functional teams to define test strategies, create test plans, and ensure comprehensive test coverage across Salesforce Sales Cloud, Service Cloud, and Community Cloud.
- Led end-to-end testing flows, ensuring seamless integration from Sales Cloud to Billing and License Provisioning systems.
- Conducted manual and automated testing of web applications, identifying and reporting defects, and tracking resolutions.
- Integrated test automation into CI/CD pipelines using Jenkins, accelerating software delivery timelines.
- Mentored and trained junior team members in automation best practices, coding standards, and advanced testing methodologies, improving overall team efficiency.
- Utilized Git for version control, ensuring seamless collaboration on test scripts.
- Presented automation demos to clients, showcasing advanced testing technologies and receiving highly positive feedback.
- Maintained and optimized the automation testing framework to support parallel execution and rerun on failures.
- Played a key role in testing a high-impact product, contributing to its success as the best-selling product for the client.
- Delivered technical sessions and hands-on training on Java, Selenium, and Manual Testing to college students, helping bridge the industry-academia gap and mentor future QA professionals.

Salesforce Quality Analyst

August 2019 - June 2025 (5 years 11 months)
Chandigarh, India

- Worked across multiple phases of SDLC and STLC, including Requirement Analysis, Design, Development, and Testing.
- Coordinated with various stakeholders to manage expectations and streamline test processes.
- Developed Selenium WebDriver automation scripts to optimize testing costs and improve efficiency.
- Conducted comprehensive testing for Salesforce Sales Cloud, Service Cloud, and Community Cloud applications.
- Designed and executed end-to-end testing flows, ensuring smooth integrations from Sales Cloud to downstream systems like Billing and License Provisioning.
- Implemented automated UI and API testing using Selenium (Java), Playwright (Python), and Postman, reducing manual testing efforts and improving accuracy.
- Integrated automated test cases into CI/CD pipelines, ensuring faster and more reliable releases.
- Contributed to the maintenance and enhancement of test automation frameworks, optimizing test execution and management.
- Trained new hires and team members on automation frameworks, API testing, and Salesforce testing strategies.

Infosys

Software Test Engineer

September 2015 - August 2019 (4 years)
Pune, Maharashtra, India

- Worked as a Manual QE on credit card dispensing web application for a banking client and to optimizethe legacy code.
- Successfully conducted database testing, web application testing, and performance testing, ensuringthe reliability and performance of critical systems.
- Collaborated with cross-functional teams to define test cases, execute tests, and identify and reportdefects for prompt resolution.
- Developed automation scripts using Selenium (Java), enhancing test automation coverage andreducing manual effort.
- Utilized TestNG for test case management and reporting, providing clear insights into test results.
- Contributed to the creation of automation frameworks to standardize testing processes and improvemaintainability.

- Worked as a Manual QE on loan offering system.
- Tested Data migration project to move data from old to new servers as they came of age.

Innovatrix Software Services Private Limited
Intern
December 2014 - May 2015 (6 months)
Gurgaon, Haryana, India

Developed android app for content management system.
